Horizon 2020 ETC 636126

Test Report

E2E Tests

Deliverable D2.3

08 June 2016

Draft, 0.9 – 24 January 2017
Final, 1.0 – 26 June 2017

Any dissemination of results reflects only the author's view. The Agency is not responsible for any use that may be made of the information it contains.

Executive Summary

The initial objective of deliverable D2.3, the Test Report, was to report the results of the final test.

In a span of one month, two test runs were performed in the ETC Lab environment in Amersfoort. The system under test was the reference implementation of the ABT system envisioned for ETC. The result of this test is documented in this report.

Based on the results of the tests, we could conclude that the overall ABT concept was possible to implement. This ensured that we could confidently continue with the development of the different ABT system components necessary for the realization of the pilots.

Table of Contents

1. Test Report

1.1. Introduction

The European Travellers Club is a pan-European initiative to enable an interoperable travel experience across countries using a single travel card.

This deliverable is described in the Grant Agreement as "Test Report" and deliverable number 2.3. It is part of Work package 2: Quality Assurance.

In this document, you will find the results of the End-2-End tests and the corresponding dynamic linking libraries (dlls) used for the implementation. The tests were performed manually at the ETC Lab in Amersfoort.

1.2. Management Summary

The document provides an overview of the tests conducted. The tests were divided into the following categories:

1. Issuance and Creation: Creating and ABT account and issuing a travel card, GST fare medium.
2. Local Travel with Local Card: Using the card for local travel.
3. Foreign Travel with Local Card: Using the Dutch Card in Germany and vice versa.
4. Revenue Assurance: PTO inspector checking local and foreign cards.
5. Local Card Hotlisting (Blacklisting): Decline Local hotlisted cards.
6. Foreign Card Hotlisting: Decline Foreign hotlisted cards.
7. Account Updates
8. Park and Ride
9. Account Deactivation

The above tests were conducted in a lab environment using reference implementation. As a result, it was not possible to execute all the listed tests. The document gives information on the various test scenarios, whether they could be tested in the lab, the result (pass, fail, not tested) and remarks (if applicable).

The tests were conducted for the following reasons:

1. Test the entire traveller journey.
2. Test the integration of components in the lab environment.
3. Discover possible exception scenarios.

est Execution Report

were two cycles tests executed, one on 16th of March 2016 and one on 5th of April 2016.

an overview of the tests and the corresponding libraries used.

2.1. First test, 16 March 2016 – test results

Test Results

Test Date: 16 March 2016
Software Enviornment: Lab Environment

Test Scenarios

Issuance and Creation	Can be tested in Lab	Remarks	Results	Test Observations and Remarks
Traveler creates ABT account.	yes		Pass	1. Account Creation was successful using mobile phone. 2. User information as part of account creation is encrypted at the back end. 3. Successfully linked and unlinked an ETC token to a user account. 4. While creating an account the user is asked to choose a passcode. Currently, no input validation is done to prevent commonly used passcodes. 5. Account Creation using a web portal was not implemeted. Hence, not tested. 6. There was an issue when trying to bind an already bound token. The issue was fixed but the underlying issue still remained. 7. There was an issue when binding a newly activated token. The issue was solved by rebooting the web server but there was no definite explanation.
Traveler buys prepaid ABT.	no	A prepaid account can be appointed to a traveller, which can then be used in the lab	Pass	1. A prepaid account was successfully appointed to the traveller. 2. Mutiple prepaid accounts can be appointed to the traveller. 3. Incase of mutiple prepaid account the priorit y is given to the account at the top. (Supported but not tested) 4. Incase the top most prepaid account runs out of balance then the one below is not automatically selected. Manual intervention is required to choose the second/other option. (supported but not tested) 5. Incase, the top most payment option is not supported the one supported is selected automatically. (Not tested)
Traveler buys postpaid ABT.	no	A postpaid account can be appointed to a traveller, which can then be used in the lab	Pass	1. Successful Co-existence of prepaid and post paid account. 2. Incase of active prepaid and postpaid account the user has to choose a preferred payment method.
Traveler creates a ticket.	yes	In the lab we call this subscribing to a service. Subscriptions can be turned on and off by the traveller	Pass	1. Successfully tested for Swedish and Danish subscriptions.
Local Travel with Local Card				

Traveler uses Dutch Travel Card while travelling in Netherlands.	yes	Several local services can be tested	Pass	
Traveler uses German Travel Card while travelling in Germany.	yes	If Germany is replaced by Sweden, in the lab we have a Dutch, Swedish and Danish hub	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Traveler uses Luxembourg Travel Card while travelling in Luxembourg.	yes	If Luxembourg is replaced by Denmark, in the lab we have a Dutch, Swedish and Danish hub	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Foreign Travel with Local Card				
Traveler uses Dutch travel card while travelling inside Germany.	yes		Pass	1. The test was performed on Swedish and Danish hub. 2. Denmark worked with GST 2.1 but Sweden did not. Possible Configuration issue.
Traveler uses Dutch travel card while travelling inside Luxembourg.	yes		Pass	See above
Traveler uses German travel card while travelling inside Netherlands.	yes		Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Traveler uses German travel card while travelling inside Luxembourg.	yes		Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Traveler uses Luxembourg travel card while travelling inside Netherlands.	yes		Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Traveler uses Luxembourg travel card while travelling inside Germany.	yes		Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Revenue Assurance				
German PTO inspects account of German Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested	
German PTO inspects account of Dutch Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested	

3	German PTO inspects account of Luxembourg Traveler	No		Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested
1	Dutch PTO inspects account of Dutch Traveler	No		Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested
2	Dutch PTO inspects account of German Traveler	No		Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested
3	Dutch PTO inspects account of Luxembourg Traveler	No		Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested
1	Luxembourg PTO inspects account of Luxembourg Traveler	No		Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested
2	Luxembourg PTO inspects account of German Traveler	No		Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested

3	Luxembourg PTO inspects account of Dutch Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested	
	TLS back office calculates fares for ABT accounts	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested	
	TLS back office invoices German PTO	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested	
	TLS back office invoices VDV-ETS	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested	
	Local Card Hot Listing				
	Traveler's "Invalid" Dutch card is declined on the Dutch terminals.	yes	Tokens can be blacklisted	Fail	P+R was showing success on terminal for blacklisted GST 2.1 token.
	Traveler's "Invalid" German card is declined on the German terminals.	yes	Tokens can be blacklisted	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
	Traveler's "Invalid" Luxembourg card is declined on the Luxembourg terminals.	yes	Tokens can be blacklisted	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
	Foreign Card Hot Listing				
	Traveler's "Invalid" Dutch card is declined on the German terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested	
	Traveler's "Invalid" Dutch card is declined on the Luxembourg terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested	

	Traveler uses German travel card to travel to Netherlands.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases
	Traveler uses German travel card to travel to Luxembourg.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases
	Traveler uses Luxembourg travel card to travel to Netherlands.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases
	Traveler uses Luxembourg travel card to travel to Germany.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases
	Component Testing Scenarios				
	German scheme operator issues card with VDV-KA + GST	no	Not implemented in Lab	Not Tested	
	Dutch scheme operator issues card with OV-chipcard + GST	no	Not implemented in Lab	Not Tested	
	Luxembourg scheme operator issues card with VDV-KA + GST	no	Not implemented in Lab	Not Tested	

	Description	Supported	Comment	Result	Notes
3	Traveler's "Invalid" German card is declined on the Dutch terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested	
4	Traveler's "Invalid" German card is declined on the Luxembourg terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested	
5	Traveler's "Invalid" Luxembourg card is declined on the Dutch terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested	
6	Traveler's "Invalid" Luxembourg card is declined on the German terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested	
7	Traveler's "Invalid" Luxembourg card is declined on the Luxembourg P+R terminals.	yes	Tokens can be blacklisted	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
8	Traveler's "Invalid" German card is declined on the Luxembourg P+R terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested	
9	Traveler's "Invalid" Dutch card is declined on the Luxembourg P+R terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested	
	Account Updates				
	Traveler changes the chosen proposition.	?	If this means changing your paymentmethod, this is testable.	Pass	Sucessfully changed payment methods from prepaid to postpaid and vice versa.
	Traveler top ups the chosen proposition.	yes	Topup is implemented	Pass	
	Traveler checks the balance of the chosen proposition.	yes	Check Balance is implemented	Pass	
	Dutch Traveler buys German ticket	yes	Ticket for travelling from Denmark to Sweden is supported	Pass	Tested with ticket from Denmark to Sweden.
	German Traveler adds payment method accepted in Netherlands	-	Payments are handled on 'home-hub', foreign hub receives money from 'home-hub'		
	Park and Ride				
01	Traveler uses Luxembourg travel card to pay for Luxembourg P+R .	no	Not implemented in Lab	Not Tested	
01	Traveler uses German travel card to pay for Luxembourg P+R .	no	Not implemented in Lab	Not Tested	
01	Traveler uses Dutch travel card to pay for Luxembourg P+R .	no	Not implemented in Lab	Not Tested	
	Account Deactivation				
	Traveler deactivates account.	no	Not implemented in Lab	Not Tested	
	Traveler deactivates the chosen proposition.	no	Not implemented in Lab	Not Tested	
	Traveler's account is blocked by the IOTAP.	yes	Token can be blacklisted	Not Tested	Not implemented as of now
	Cross Country Travel				
	Traveler uses Dutch travel card to travel to Germany.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases
	Traveler uses Dutch travel card to travel to Luxembourg.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases

2.1. Second test, 5 April 2016 – test results

Test Results

Test Date:
05 April 2016
Software
Enviornment:
Lab Environment

Test Scenarios

Issuance and Creation	Can be tested in Lab	Remarks	Results (16 March 2016)	Test Observations and Remarks (16 March 2016)	Results (05 April 2016)	Test Observations and Remarks (05 April 2016)
Traveler creates ABT account.	yes		Pass	1. Account Creation was successful using mobile phone. 2. User information as part of account creation is encrypted at the back end. 3. Successfully linked and unlinked an ETC token to a user account. 4. While creating an account the user is asked to choose a passcode. Currently, no input validation is done to prevent commonly used passcodes. 5. Account Creation using a web portal was not implemeted. Hence, not tested. 6. There was an issue when trying to bind an already bound token. The issue was fixed but the underlying issue still remained. 7. There was an issue when binding a newly activated token. The issue was solved by rebooting the web server but there was no definite	Pass	1. Account Creation was successful using mobile phone. 2. User information as part of account creation is encrypted at the back end. 3. Successfully linked and unlinked an ETC token to a user account. 4. While creating an account the user is asked to choose a passcode. Currently, no input validation is done to prevent commonly used passcodes. 5. Account Creation using a web portal was not implemeted. Hence, not tested. 6. There was an issue when trying to bind an already bound token. The issue was fixed but the underlying issue still remained. 7. Sucessful to bound an already activated token. 8. Successful to bound a newly activated token.

Traveler buys prepaid ABT.	no	A prepaid account can be appointed to a traveller, which can then be used in the lab	Pass	1. A prepaid account was successfully appointed to the traveller. 2. Mutiple prepaid accounts can be appointed to the traveller. 3. Incase of mutiple prepaid account the priorit y is given to the account at the top. (Supported but not tested) 4. Incase the top most prepiad account runs out of balance then the one below is not automatically selected. Manual intervention is required to choose the second/other option. (supported but not tested) 5. Incase, the top most payment option is not supported the one supported is selected automatically. (Not tested)	Pass	1. A prepaid account was successfully appointed to the traveller. 2. Mutiple prepaid accounts can be appointed to the traveller. 3. Incase of mutiple prepaid account the priority is given to the account at the top. (Supported but not tested) 4. Incase the top most prepaid account runs out of balance then the one below is not automatically selected. Manual intervention is required to choose the second/other option. (supported but not tested) 5. Incase, the top most payment option is not supported the one supported is selected automatically.
Traveler buys postpaid ABT.	no	A postpaid account can be appointed to a traveller, which can then be used in the lab	Pass	1. Successful Co-existence of prepaid and post paid account. 2. Incase of active prepaid and postpaid account the user has to choose a preferred payment method.	Pass	1. Successful Co-existence of prepaid and post paid account. 2. Incase of active prepaid and postpaid account the user has to choose a preferred payment method.
Traveler creates a ticket.	yes	In the lab we call this subscribing to a service. Subscriptions can be turned on and off by the traveller	Pass	1. Successfully tested for Swedish and Danish subscriptions.	Pass	1. Successfully tested for Swedish and Danish subscriptions.
Local Travel with Local Card						
Traveler uses Dutch Travel Card while travelling in Netherlands.	yes	Several local services can be tested	Pass		Pass	

Traveler uses German Travel Card while travelling in Germany.	yes	If Germany is replaced by Sweden, in the lab we have a Dutch, Swedish and Danish hub	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	Tested with Danish cards with Danish terminal. That was successful.
Traveler uses Luxembourg Travel Card while travelling in Luxembourg.	yes	If Luxembourg is replaced by Denmark, in the lab we have a Dutch, Swedish and Danish hub	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	same as above
Foreign Travel with Local Card						
Traveler uses Dutch travel card while travelling inside Germany.	yes		Pass	1. The test was performed on Swedish and Danish hub. 2. Denmark worked with GST 2.1 but Sweden did not. Possible Configuration issue.	Pass	
Traveler uses Dutch travel card while travelling inside Luxembourg.	yes		Pass	See above	Pass	
Traveler uses German travel card while travelling inside Netherlands.	yes		Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Traveler uses German travel card while travelling inside Luxembourg.	yes		Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Traveler uses Luxembourg travel card while travelling inside Netherlands.	yes		Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Traveler uses Luxembourg travel card while travelling inside Germany.	yes		Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.

	Revenue Assurance						
1	German PTO inspects account of German Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested	
2	German PTO inspects account of Dutch Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested	
3	German PTO inspects account of Luxembourg Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested	

1	Dutch PTO inspects account of Dutch Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested
2	Dutch PTO inspects account of German Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested
3	Dutch PTO inspects account of Luxembourg Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested

Luxembourg PTO inspects account of Luxembourg Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested
Luxembourg PTO inspects account of German Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested
Luxembourg PTO inspects account of Dutch Traveler	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested

TLS back office calculates fares for ABT accounts	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested	
TLS back office invoices German PTO	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested	
TLS back office invoices VDV-ETS	No	Ticker View or Account status view for third parties not supported (yet) e.g. Customer Support, Inpector or EcoSpace owner - Deployment requires implementation tight privcay friendly precepts that are in line with the ETC T&C (which are not yet published)	Not Tested		Not Tested	
Local Card Hot Listing						
Traveler's "Invalid" Dutch card is declined on the Dutch terminals.	yes	Tokens can be blacklisted	Fail	P+R was showing success on terminal for blacklisted GST 2.1 token.	Pass	P+R Andriod apps do not support GS2.1 hence failure on 16 March 2016

Traveler's "Invalid" German card is declined on the German terminals.	yes	Tokens can be blacklisted	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Traveler's "Invalid" Luxembourg card is declined on the Luxembourg terminals.	yes	Tokens can be blacklisted	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.
Foreign Card Hot Listing						
Traveler's "Invalid" Dutch card is declined on the German terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested		Not Tested	works locally but not over the hub
Traveler's "Invalid" Dutch card is declined on the Luxembourg terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested		Not Tested	
Traveler's "Invalid" German card is declined on the Dutch terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested		Not Tested	
Traveler's "Invalid" German card is declined on the Luxembourg terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested		Not Tested	
Traveler's "Invalid" Luxembourg card is declined on the Dutch terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested		Not Tested	
Traveler's "Invalid" Luxembourg card is declined on the German terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested		Not Tested	
Traveler's "Invalid" Luxembourg card is declined on the Luxembourg P+R terminals.	yes	Tokens can be blacklisted	Not Tested	Supported but was not possible to test since there were no German or Luxembourg travel cards/terminal settings.	Not Tested	

Traveler's "Invalid" German card is declined on the Luxembourg P+R terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested		Not Tested	
Traveler's "Invalid" Dutch card is declined on the Luxembourg P+R terminals.	no	Blacklisting is not communicated yet over the interop	Not Tested		Not Tested	
Account Updates						
Traveler changes the chosen proposition.	?	If this means changing your paymentmethod, this is testable.	Pass	Sucessfully changed payment methods from prepaid to postpaid and vice versa.	Pass	
Traveler top ups the chosen proposition.	yes	Topup is implemented	Pass		Pass	
Traveler checks the balance of the chosen proposition.	yes	Check Balance is implemented	Pass	Float on mobile app and integer on payter terminal	Pass	
Dutch Traveler buys German ticket	yes	Ticket for travelling from Denmark to Sweden is supported	Pass	Tested with ticket from Denmark to Sweden.	Pass	
German Traveler adds payment method accepted in Netherlands	-	Payments are handled on 'home-hub', foreign hub receives money from 'home-hub'				
Park and Ride						
Traveler uses Luxembourg travel card to pay for Luxembourg P+R .	no	Not implemented in Lab	Not Tested		Not Tested	
Traveler uses German travel card to pay for Luxembourg P+R .	no	Not implemented in Lab	Not Tested		Not Tested	
Traveler uses Dutch travel card to pay for Luxembourg P+R .	no	Not implemented in Lab	Not Tested		Not Tested	
Account Deactivation						
Traveler deactivates account.	no	Not implemented in Lab	Not Tested		Not Tested	

Traveler deactivates the chosen proposition.	no	Not implemented in Lab	Not Tested		Not Tested	
Traveler's account is blocked by the IOTAP.	yes	Token can be blacklisted	Not Tested	Not implemented as of now	Pass	Tool used to test: GST 2.1 test bench Not possible to verify signature because the ECC configuration was still not done. However, the following was checked as part of the offline test cases: Black List White List Token expiry Token revocation
Cross Country Travel						
Traveler uses Dutch travel card to travel to Germany.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases	Not Tested	
Traveler uses Dutch travel card to travel to Luxembourg.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases	Not Tested	
Traveler uses German travel card to travel to Netherlands.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases	Not Tested	
Traveler uses German travel card to travel to Luxembourg.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases	Not Tested	
Traveler uses Luxembourg travel card to travel to Netherlands.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases	Not Tested	
Traveler uses Luxembourg travel card to travel to Germany.	no	Check in in one country and checkout in other country is not supported	Not Tested	Falls into Exception Cases	Not Tested	
Component Testing Scenarios						

German scheme operator issues card with VDV-KA + GST	no	Not implemented in Lab	Not Tested		Not Tested	
Dutch scheme operator issues card with OV-chipcard + GST	no	Not implemented in Lab	Not Tested		Not Tested	
Luxembourg scheme operator issues card with VDV-KA + GST	no	Not implemented in Lab	Not Tested		Not Tested
